

To the families of children affected by Retinoblastoma

Dear parent,
your child's illness, in 40% of cases, can be of hereditary origin.

The Unit of Medical Genetics of the Siena University Hospital is at your disposal, for **diagnostic services** or **generic consultancy**, but also to provide you with useful advice before further pregnancies, to discuss your child's case for prognostic and follow-up purposes. up and eventually deepen it with molecular investigations.

UOC GENETICA MEDICA

Lotto 3, piano 1
